

CLIENT REVIEW · DRAFT

LAP LANDSCAPING · LOCAL PROTOTYPE V7.1

Client Review Package

Custom Landscaping & Hardscape Solutions for Beautiful Outdoor Living

Prepared by: TIC Claude Code (Tech Innova Solutions)

Date: 2026-05-08

Build: Local prototype v7.1 · committed in `f92796c`

Status: Local prototype only — production / live site untouched

Service area: Lake Norman · Mooresville · Troutman · Iredell County, NC

LAP Landscaping — Client Review Package (v7.1)

Prepared by: TIC Claude Code (Tech Innova Solutions)

Date: 2026-05-08

Build: Local prototype v7.1 · committed in `f92796c`

Status: Local prototype only — production / live site untouched

1. Executive Summary

LAP Landscaping now has a **complete, client-facing local prototype** that is ready for review and approval. The build closes the gap between the existing public site and the approved homepage mockup direction.

What improved

- A premium homepage matching the approved mockup: cinematic fire-pit dusk hero, six service cards with clear category imagery, an authentic LAP team-with-truck About section, a dark green Featured Projects band, a four-step process, a homeowner reviews block with a 5.0 ★★★★★ trust row, a bilingual FAQ, and a strong final-estimate CTA.
- Bilingual support (English / Spanish) is wired throughout the homepage and the six service pages, with a working EN | ES toggle in both the utility bar and the footer.
- The official LAP logo is in place in the header (and in a cream-bg pill in the footer for legibility on dark green).
- All imagery now serves locally so the prototype renders reliably for review without any network dependency.
- SEO copy and structure are tightened with Lake Norman, Mooresville, Troutman, and Iredell County signals woven into headings, body copy, and image alt text.

Why this is stronger

- The hero communicates the actual value LAP delivers — premium outdoor living — instead of a generic landscaping pitch.
- Service categories now match real customer search behavior: paver patios + retaining walls, irrigation, sod, landscape lighting, drainage + grading, mulch + aeration + pruning.
- Local trust is reinforced by a real LAP crew photo, "Hablamos Español" badging, repeated phone visibility, and a 100% satisfaction guarantee.

- The prototype is mobile-first and conversion-first; the "Free Estimate" CTA is one tap away from any scroll position on mobile thanks to a sticky bottom bar.

Main business value

- Higher conversion intent — clearer value proposition + clearer CTAs.
 - Local-search readiness — geographically specific copy + alt text + service pages.
 - Bilingual market reach — English and Spanish presented as a first-class feature, not a footnote.
 - Faster sales cycle — homeowners can see exactly which service applies to them and book a free estimate in two taps.
-

2. Visual Improvement Summary

Hero

- Headline: *"Custom Landscaping & Hardscape Solutions for Beautiful Outdoor Living"*.
- Region line in italic under the headline: *Proudly Serving Lake Norman & Surrounding Communities*.
- Two CTAs: green **Get a Free Estimate** primary + ghost **View Our Work →** secondary.
- Bilingual line below CTAs: "🌐 *Se habla Español | We speak English & Spanish*".
- Right side: large rounded fire-pit dusk patio image cropped from the approved mockup, with a floating cream trust badge showing 5★ and *100% Satisfaction Guaranteed · Free, no-pressure estimate*, and a small "hardscape specialists" mini-card.
- Subtle warm radial glow behind the photo for depth.

Services

- Section title: *Complete Outdoor Solutions*.
- Six premium service cards in a 3 × 2 grid, each with:
 - Real category image (Patos, Sprinklers, Sod, Lighting, Drainage, Mulch).
 - Small green icon disc.
 - SEO-friendly title + concise description.
 - **Learn More →** link to a dedicated service page.
 - Hover lift + image zoom for premium feel.

About / Local Trust

- Headline: *"Built on Integrity. Focused on Quality. Proudly Local."*
- Image cluster: real LAP crew-with-truck photo (lead) plus two smaller floating frames (paver scene + outdoor-living scene). "Local Crew · No subs · No shortcuts" badge floats over the cluster.
- Three numbered differentiators: single accountable crew · hardscape specialists · bilingual & local.
- CTA: **Talk to the LAP Crew**.

Featured Projects

- Dark green section to anchor the brand and break up the lighter sections above and below.
- Title: *"Outdoor Spaces Built to Impress."*
- Tan **Start Your Project →** CTA.

- 4-image mosaic on the right: luxury fire-pit patio (lead) + paver/lawn + sprinkler + sod restoration. Each tile carries premium drop shadows for depth on the dark background.

Reviews

- Title: *"Trusted by Homeowners Across Lake Norman"*.
- 5.0 ★★★★★ rating row with a "real reviews required before launch" disclaimer.
- Three placeholder testimonial cards in a 3-up grid with project type labels.

FAQ

- Bilingual heading: *"Frequently Asked Questions | Preguntas Frecuentes"*.
- Sticky-left layout. Accordion with four questions, including **¿Hablan español?** answered in Spanish.

Final CTA / Footer

- Final CTA band in deep green with a bilingual headline: *"Ready to Elevate Your Outdoor Space? | ¿Listo para transformar su espacio exterior?"*. Twin radial gradients add depth. Tan estimate CTA + light ghost phone CTA. STOP-keyword fineprint preserved.
 - Footer in deepest green. The official LAP logo sits in a cream rounded pill so it reads cleanly. Three-column layout: Services (links to all six service pages), Company (Our Work, About LAP, Reviews, FAQ, Free Estimate), Contact (phone, email, Troutman address, Privacy Policy, SMS Terms). A second EN | ES toggle (light variant). Base row with copyright + prototype flag.
-

3. SEO Improvement Summary

Local SEO signals

- Service-area cities appear naturally in: utility bar, hero region line, hero pill, service-card alt text, project mosaic alt text, FAQ answers, footer address, and the bilingual hero line.
- Cities used: Troutman, Mooresville, Lake Norman, Iredell County. No keyword stuffing — each appears in semantically relevant context.

Service keyword improvements

- Each service has a dedicated landing page targeting a primary keyword + geographic modifier (e.g. *Paver Patios & Retaining Walls in Mooresville, Troutman & Lake Norman*).
- Service descriptions on the homepage card and the dedicated page are aligned but not duplicated; the homepage card teases, the service page goes deep.

Heading structure

- One H1 per page (homepage and each service page).
- Logical H2 cascade: Complete Outdoor Solutions → Built on Integrity, Focused on Quality, Proudly Local → Outdoor Spaces Built to Impress → A Simple, Proven Process → Trusted by Homeowners Across Lake Norman → Frequently Asked Questions → Ready to Elevate Your Outdoor Space.
- H3 per service-card title and per service-page subhead.

Image alt text

- Every `<img>` carries descriptive alt text combining subject + service + locale (e.g. *"Smart sprinkler and irrigation system over green lawn · Lake Norman, NC"*).
- Decorative imagery (about cluster secondary frames) carries empty alt for accessibility.

Internal linking benefits

- Six dedicated service pages, all reachable from the home services grid and the footer Services column.
 - Service pages cross-link to each other in the footer (encouraging deep crawls).
 - Home anchors (`#services` , `#projects` , `#about` , `#reviews` , `#faq` , `#contact`) keep the homepage useful as a single-page conversion experience while still feeding the multi-page architecture.
-

4. Conversion Improvement Summary

CTA improvements

- Primary CTA copy is consistent across the page: **"Get a Free Estimate"**.
- The CTA is placed in: header right, hero, every service-card-page, final CTA band, footer Company column, and mobile sticky bottom bar (so it is visible on every scroll position on mobile).
- Secondary CTA copy: **"View Our Work →"** (hero), **"Start Your Project →"** (Featured Projects), **"Talk to the LAP Crew"** (About), **"Or Call 704-327-5663"** (CTA band).

Trust signals

- 100% Satisfaction Guaranteed badge with 5★ in the hero.
- Trust row of four cards: Licensed & Insured, Detail-Oriented Craftsmanship, Custom Solutions, Satisfaction Guaranteed.
- Reviews section with 5.0 ★★★★★ rating.
- Real LAP crew photo in the About cluster.
- "Local Crew · No subs · No shortcuts" floating badge.
- Phone number visible in the utility bar, footer, mobile sticky bar, and embedded in the final CTA.

Bilingual support

- "Hablamos Español" pill in the utility bar and footer.
- EN | ES toggle in both the utility bar and the footer.
- Hero, service cards, About, FAQ, final CTA, and footer copy all switch cleanly between English and Spanish.
- Bilingual FAQ entry (¿Hablan español?).
- localStorage persistence and navigator.language autodetect.

Free estimate flow

- Every "Get a Free Estimate" button routes to the existing JotForm (https://form.jotform.com/261096626914059) with target="_blank" rel="noopener" . The current public-facing form is preserved exactly as is.
- Optional alternative path: tap-to-call tel:+17043275663 .

Phone visibility

- Phone number 704-327-5663 appears in: utility bar, final CTA band, footer Contact column, mobile sticky CTA, and as the alt path on every service page.

5. Screenshot References

Final v7.1 build (recommended for client review)

- Desktop full page: `03-Clients/LAP-Landscaping/design-prototype/review-screenshots-v7-1/desktop-1440-fullpage.png`
- Mobile full page: `03-Clients/LAP-Landscaping/design-prototype/review-screenshots-v7-1/mobile-390-fullpage.png`

Earlier passes (optional before/after context only)

- v2 — first prototype: `review-screenshots-v2/desktop-1440-fullpage.png`
- v4 — bilingual + service-page split: `review-screenshots-v4/desktop-1440-fullpage.png`
- v5 — first mockup alignment: `review-screenshots-v5/desktop-1440-fullpage.png`
- v6 — image quality + dimensional polish: `review-screenshots-v6/desktop-1440-fullpage.png`
- v7 — visual + SEO polish: `review-screenshots-v7/desktop-1440-fullpage.png`

Use only v7.1 for the client review meeting. Earlier passes are kept for an internal audit trail.

How to open the prototype locally

```
open "/Users/luisalfredomartinez/TIC Claude Code/03-Clients/LAP-Landscaping/design-pro
```

6. Implementation Handoff Checklist

These items are required before any production migration. The local prototype does **not** ship as-is; it is the design and copy reference for whoever implements it on the WordPress site.

Assets needed (from client)

- Real LAP project photography (≥1200 px wide, hero + 6 services + About + 4 mosaic tiles).
- Real LAP team-with-truck photo (the mockup-derived image is direction only).
- Vector LAP logo (`.svg` preferred, `.eps` or `.ai` acceptable). The current `lap-logo.png` reads at 64 px tall but a vector source future-proofs the build.
- Real customer testimonials (with consent) to replace placeholder reviews.
- Trust stat numbers (years in business, projects completed, average rating).
- Confirmed service-area cities and radius.
- Hours of operation.
- License number(s) for trust signal (optional but recommended).
- Owner / company short bio (50–80 words) for the About section.

Images / logo notes

- All current photo files live under `reference/photos/`. Replace with real LAP imagery before launch — same file names so HTML does not change.
- Cream-pill footer treatment of the logo can be removed if the live build provides a white/cream version of the logo (e.g. `lap-logo-light.svg`) — swap into footer source and remove the pill wrapper.

SEO metadata to preserve

- `<title>` and `<meta name="description">` are bilingual-aware. Keep both EN and ES copies in the dictionary on launch.
- One H1 per page. Do not duplicate the H1 across the header and a section.
- Image `alt` text already includes subject + service + locale; keep these unchanged unless the client provides a different geographic emphasis.
- Add `LocalBusiness`, `Service`, and `FAQPage` schema.org JSON-LD before launch (not present in the prototype). The required fields (phone, address, hours, service area, areaServed, priceRange, languages) are listed in the open assets above.

Pages / sections to implement

- Homepage with the section order in the prototype.

- Six service pages (currently in `services/`):
- `paver-patios-retaining-walls.html`
- `irrigation-sprinkler-systems.html`
- `sod-installation-lawn-care.html`
- `landscape-lighting.html`
- `drainage-grading-solutions.html`
- `mulch-aeration-pruning.html`
- Privacy Policy and SMS Terms pages — preserve verbatim from the current public site (legally meaningful).

Mobile QA checklist (before launch)

- ☐ Hero stacks single-column at 390 px without crowding.
- ☐ Sticky bottom CTA bar is visible on every scroll position.
- ☐ EN | ES toggle remains tappable and visible after wrap.
- ☐ All `Get a Free Estimate` buttons route to JotForm in a new tab.
- ☐ Phone tap-to-call works on iOS and Android.
- ☐ Service-page hero stacks cleanly.
- ☐ FAQ accordion expands without horizontal jump.
- ☐ No horizontal overflow in any breakpoint between 320 px and 1440 px.

Form / JotForm caution

- The `Get a Free Estimate` button targets the existing JotForm `261096626914059` outbound only. **Do not modify the JotForm during implementation** unless the client explicitly approves it. SMS opt-in copy must remain compliant with current SMS Terms.

Production safety checklist

- No WordPress edits.
 - No GoDaddy account changes.
 - No DNS or hosting changes.
 - No JotForm form structure changes.
 - No plugin / theme / security changes.
 - No deploy.
 - No installs of new tools without explicit approval.
-

7. Remaining Recommendations

1. **Real project photography.** The prototype uses photographs cropped from the approved mockup PNG plus stock fillers. Deliver ≥ 3 real LAP photos per category (patio, irrigation, sod, lighting, drainage, mulch) plus the team-with-truck photo. Hero + projects mosaic photos should be the strongest in the set.
 2. **Final logo asset cleanup.** Provide an `.svg` logo and a `lap-logo-light.svg` variant for the dark footer. The cream-pill footer treatment can be removed once a white/cream version exists.
 3. **Real testimonials.** Collect at least three customer reviews with written consent. Star ratings and project type tags should be preserved.
 4. **Email typo decision.** The privacy page references `service@laplandscapiing.com` (extra "i") while every other location uses `service@laplandscaping.com`. Confirm the canonical address; it is most likely the second one.
 5. **Trust stat numbers.** Provide quantified numbers for: years in business, projects completed, average review rating.
 6. **Native Spanish review.** Have a native speaker review every Spanish string in the dictionary and the inline `data-es` attributes on service pages before launch.
 7. **Schema.org markup.** Add `LocalBusiness`, `Service`, and `FAQPage` JSON-LD before launch, populated with hours, address, phone, service area, languages, and price range if provided.
 8. **Pre-launch PageSpeed pass.** Once the WordPress build is in place, run a Lighthouse audit and target ≥ 90 on Performance, Accessibility, Best Practices, and SEO.
-

Confirmations

-  No production / live-site changes.
-  No new commits, no installs, no deploys, no agents.
-  Documentation only.
